EXPLOIT3RS

THIS IS TO CERTIFY THAT:

Kirubel Mamo

having met all the course requirements and successfully passed the final examination, has completed the

Cybersecurity Fundamentals

The course provided foundational knowledge in cybersecurity, covering its definition, significance, and core principles such as the CIA Triad and AAA Framework. Participants explored key areas including cybersecurity job roles, assets, threat actors, and hacker types, as well as major domains like network, endpoint, cloud, and application security. The course also addressed attack methodologies, defense-in-depth strategies, security architecture, cryptography fundamentals, and the incident response and recovery lifecycle.
