THIS IS TO CERTIFY THAT:

Mhd Nazir Sagherji

having met all the course requirements and successfully passed the final examination, has completed the

CTF Level 1: The Beginning

This course delivers essential practical knowledge on the basics of Capture the Flag (CTF) competitions and four key domains in cybersecurity: OSINT, Digital Forensics, Networking, and Web Exploitation. It explores the real-world applications of each domain, introduces learners to essential tools and techniques used by professionals, and provides hands-on practice through CTF challenges for every category. The course connects foundational concepts to practical cybersecurity scenarios—equipping learners to apply their skills effectively, think critically under pressure, and strengthen their overall technical capabilities.
